

Copack

The Copack 550 enables you to package your sliced meats and cheese, as well as other products such as fish and sandwiches, at a rate of up to 35 packages per minute. You can set the length of the packaged units yourself, with a choice of 14 different unit lengths.

The Copack can be used as a separate machine or as a fully automatic packaging machine behind an automatic slicing machine for meat and cheese.

The Copack 550 is the ultimate in packaging convenience. The touch key operation is self-evident and any operating errors or malfunctions are shown immediately in the display unit. The packaging process starts automatically as soon as you place the product on the feed belt. Input, packaging and output all take place automatically. The Copack 550 has a smooth stainless steel finish and is easy to clean. Sealing takes place by means of impulses, so that no constant heat source is necessary. This results in a substantial energy saving with almost no heat transfer to the product to be packaged. The Copack 550 does not need any time to warm up, which brings an end to waiting times.

As an option, a mobile undercarriage and collection basket can be supplied. Use of the undercarriage ensures the correct operating height and the machine can then also be moved easily for cleaning work.

Technical data

Machine	Copack
Application	Packaging portions of sliced fresh products and bread
Technology	Film packaging machine (Klappack)
Operation	Can be set to manual or automatic
Capacity	Up to 35 strokes per minute
Options	Mobile undercarriage Collection basket
Electrical connection	220-240 V / 50-60 Hz – 2.0 kW
Machine dimensions	55 x 52 x 52 cm (width x depth x height)
Weight	55 kg
Certification	CE
Packaging format	Length: Adjustable from 100 to 230 mm Width: 235 (with film width of 235 mm)
Maximum product format	190 x 190 mm
Film	Klappack film
Film width	235 mm
Film thickness	30 to 50 microns

The above values are indications and may vary with individual machines.

TenPack supplies innovative and often unique solutions for packaging all types of food. We represent the Fabbri Group, Italian Pack and Enterline manufacturers in the Benelux region. TenPack also has a number of in-house solutions that are offered world-wide.

Advice

TenPack has its own account managers, so that we can offer you good advice on the possibilities of our solutions for the products you need to package.

Technical service

TenPack has a service unit covering all the Benelux countries, with engineers operating from their own regions. Our engineers all have broad experience with the systems supplied by TenPack and are therefore able to provide excellent service in installation, maintenance and solving malfunctions.

Parts

TenPack has all the usual parts in stock, both in the central parts warehouse and in the engineers' cars and vans. This keeps any downtime in the case of a malfunction to a minimum. TenPack gives high priority to the continuity of your business operations.

Preventive maintenance

Preventive maintenance can be performed for every machine supplied by TenPack. Preventive maintenance helps to extend the life of the machine and improve its safety and reliability.

About TenPack

The name TenPack is new and was only introduced in 2024. However, our company is not a new one. TenPack arose from mergers of different companies at different times. These companies are Conpax Verpakkingstechniek, Eselbe, Servo-Wrap and R.D. De Jong.
