

Fastpack

The Fastpack is a very reliable and robust film packaging machine (Klappack). For many decades, the model has provided the solution for packaging flat products such as sliced meat products and cheese in supermarkets, specialist shops and catering companies. The Fastpack enables you to complete 25 packaging units per minute. The machine is also compact.

The Fastpack is very simple to operate with touch keys. The functions are self-evident. Any malfunctions are immediately shown on the display. The machine is very easy to maintain and simple to clean. The blade can be removed with a single action. This enables you to clean the machine simply and safely.

The Fastpack is supplied fully operational, fitted with all requirements. As an option, a mobile undercarriage and collection basket can be supplied. Use of the undercarriage ensures the correct operating height and the machine can then also be moved easily for cleaning work. It is also possible to expand the Fastpack with a foot pedal, for hands-free start-up of the machine.

The Fastpack is available in the S and XL models. The two models are identical, with the exception of the size of the sealing window and the width of the film to be processed with this. The S model is the standard, most widely-used format and the XL is the larger model, with which larger products can also be packaged.

Technical data

Machine Models	Fastpack S / XL
Application	Packaging portions of cut/sliced fresh products
Technology	Film packaging machine (Klappack)
Operation	Can be set to manual, with interval or automatic
Capacity	Up to 25 strokes per minute
Options	Mobile undercarriage Collection basket Foot pedal

Machine dimensions	90 x 50 x 35 cm (width x depth x height)
Weight	45 kg
Certification	CE
Packaging format	S: 235 x 180 mm (with film width of 270 mm)
	XL: 270 x 195 mm (with film width of 270 mm)
Maximum product format	S: 190 x 150 mm XL: 230 x 170 mm
Film	Klappack film
Film width	S: 235 mm XL: 270 mm
Film thickness	30 to 50 microns

The above values are indications and may vary with individual machines.

TenPack supplies innovative and often unique solutions for packaging all types of food. We represent the Fabbri Group, Italian Pack and Enterline manufacturers in the Benelux region. TenPack also has a number of in-house solutions that are offered world-wide.

Advice

TenPack has its own account managers, so that we can offer you good advice on the possibilities of our solutions for the products you need to package.

Technical service

TenPack has a service unit covering all the Benelux countries, with engineers operating from their own regions. Our engineers all have broad experience with the systems supplied by TenPack and are therefore able to provide excellent service in installation, maintenance and solving malfunctions.

Parts

TenPack has all the usual parts in stock, both in the central parts warehouse and in the engineers' cars and vans. This keeps any downtime in the case of a malfunction to a minimum. TenPack gives high priority to the continuity of your business operations.

Preventive maintenance

Preventive maintenance can be performed for every machine supplied by TenPack. Preventive maintenance helps to extend the life of the machine and improve its safety and reliability.

About TenPack

The name TenPack is new and was only introduced in 2024. However, our company is not a new one. TenPack arose from mergers of different companies at different times. These companies are Conpax Verpakkingstechniek, Eselbe, Servo-Wrap and R.D. De Jong.
