

Minispencer

The Minispencer is an appliance for manual packaging of various types of products in stretch wrap. The most common applications are the packaging of meat and meat products, cheese, pâté, fruit and vegetables. The appliance is also highly suitable for covering all sorts of trays and tubs and for packaging smaller volumes.

The Minispencer is easy to operate manually. It is possible to package products hygienically in stretch wrap, with or without a tray. The Minispencer is equipped with a support plate at the front of the appliance, so that the stretch wrap can be pulled tightly around the product.

The appliance has been made as compact as possible, while the 45 cm stretch wrap needed for many fresh products can still be used. The Minispencer can be placed on a workbench, so that it requires little space.

Technical data

Machine	Minispencer
Application	Packaging of fresh products
Technology	Stretch wrap
Operation	Manual
Capacity	Up to about 20 strokes per minute
Electrical connection	230 V / 50 Hz – 300 W
Machine dimensions	60 x 47 x 13 cm (width x depth x height)
Weight	7 kg
Certification	CE
Film	Stretch wrap
Film width	Up to 450 mm
Film thickness	12 to 35 microns

The above values are indications and may vary with individual machines.

TenPack supplies innovative and often unique solutions for packaging all types of food. We represent the Fabbri Group, Italian Pack and Enterline manufacturers in the Benelux region. TenPack also has a number of in-house solutions that are offered world-wide.

Advice

TenPack has its own account managers, so that we can offer you good advice on the possibilities of our solutions for the products you need to package.

Technical service

TenPack has a service unit covering all the Benelux countries, with engineers operating from their own regions. Our engineers all have broad experience with the systems supplied by TenPack and are therefore able to provide excellent service in installation, maintenance and solving malfunctions.

Parts

TenPack has all the usual parts in stock, both in the central parts warehouse and in the engineers' cars and vans. This keeps any downtime in the case of a malfunction to a minimum. TenPack gives high priority to the continuity of your business operations.

Preventive maintenance

Preventive maintenance can be performed for every machine supplied by TenPack. Preventive maintenance helps to extend the life of the machine and improve its safety and reliability.

About TenPack

The name TenPack is new and was only introduced in 2024. However, our company is not a new one. TenPack arose from mergers of different companies at different times. These companies are Conpax Verpakkingstechniek, Eselbe, Servo-Wrap and R.D. De Jong.
